TRAIN FOR EXCELLENCE: CISSP COURSE

with Ingram Micro Cyber Security

CISSP is the most premier and sought after certification for today's information security professionals. The sponsoring organization, International Information Systems Security Certification Consortium, Inc. (ISC)2 ®, regularly updates the test by using subject matter experts (SMEs) to make sure the material and the questions are relevant in today's security environment.

By defining eight security domains that comprise a CBK, industry standards for the information systems security professional have been established. The skills and knowledge you gain in this course will help you master the eight CISSP domains and ensure your credibility and success within the information systems security field.

In this course, you will identify and reinforce the major security subjects from the eight domains of the (ISC)2 CISSP CBK. The 8 domains of CISSP are:

- Security and Risk Management
- Asset Security
- Security Engineering
- Communications and Network Security
- Identity and Access Management
- Security Assessment and Testing
- Security Operations
- Software Development Security
